

**PHOENIX 3D METAAL**  
VORMT UW VOORSPRONG

**PRODUCTION EMPLOYEE**

**(39 hour a week)**

### **ABOUT PHOENIX 3D METAAL**

We are Phoenix 3D Metaal, a growing company with ambition. We were founded in 1960 as a specialist in sheet metal and in 1998 we changed sheet metal into 3D formes with a high-end look. We are innovative and continuously looking for improvement, which results in new technology. We are proud to say that we have developed one specific technology whose principle excels in simplicity: Rubber presses. The name says it all: we use a rubber cushion to form metal. A technique that we have perfectionated the last years as the only one in the Netherlands. We do this with an enthusiastic team of almost 50 colleagues, together we all strive for one goal: "Introducing the world to the unprecedented possibilities that rubber presses offer".

We are growing, have a clear course and sparkle with the ambition to continue building Phoenix 3D Metaal together with you in this new role as production employee.

# PRODUCTION EMPLOYEE (39 HOURS A WEEK)

## TOGETHER FOR PERSONAL ADVANTAGE

We are a metal company that specializes in sheet metal work. We process metal sheets into a 3D end product. In the position of production employee you will join a team of 6 enthusiastic colleagues who are only too happy to teach you the tricks of the trade. We are looking for a production employee in 2-shifts. In this position you will have to deal a lot of varied production work. Ultimately, after a full training period, you will be trained all-round on the job to become a production employee. Your activities:

- Move and process metal sheets by placing them in the machine correctly
- Adjusting the mold if this is necessary and possibly correcting it by means of engraving and measuring
- Performing quality control
- Set up machines
- Remove metal sheets from the machine
- Deburring (remove sharp edges from the metal plates)
- Packing products and preparing for shipment for the customer

As soon as you fully trained, you can also set up machines yourself. You will also be partly trained as operator.

This is a full-time position for 39 hours. You work in two shifts. One week you work in the early shift and the next week you work in the late shift. You start working in the day shift in order to be taught in the right way and calmly. Parttime and only working in day shift is negotiable.

This are the working hours for shifts:

### Early shift

Monday to thursday from 06:00- 15:00 hours.  
Friday from 06:00- 14:45 hours

### Late shift

Monday to thursday from 15:30- 00:15 hours.  
Friday from 14:45- 20:00 hours.

You will be taught on the job by your colleagues and they will gradually teach you the work as a production employee, until you can get started completely yourself. Your motivation is of paramount importance to us. Do you have no or less experience, but are you motivated to work as a production employee in a two-shift system? Then that is certainly possible!

## TO BE ABLE TO FULFILL THE FUNCTION OF ALL-ROUND PRODUCTION EMPLOYEE WELL, YOU HAVE THE FOLLOWING.

- You have an MBO work and thinking level
- You have technical insight and can work independently
- Experience with production work (preferably metal) is a big plus
- You master the Dutch language fluently in word and writing
- You are available at short notice for a full-time job

## OF COURSE YOU CAN ALSO EXPECT SOMETHING FROM US, NAMELY.

- A full-time job (39 hours a week) for a longer period of time
- A salary range between €11 and €13 gross per hour (depending on knowledge and experience)
- A varied job in which you are trained to become an all-round production employee
